DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, inter alia, a detection value amplifying circuit for generating a detection signal having the same period as that of the pulse width modulation signal on the basis of the current caused to flow through the inductive load; a deviation integrating circuit for generating a deviation integration signal corresponding to deviation integration of the setting signal and the detection signal; and a current controlling circuit for controlling the current caused to flow through the inductive load on the basis of the saw-tooth-wave signal and the deviation integration signal.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include either of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 5:30am-2:00pm.
